EDUCATION

Sardar Patel Institute of Technology

Bachelor of Engineering in Electronics and Telecommunication; CGPI: 8.99

Mumbai, India

2016 - 2020

SKILLS

Languages: Java, Go, TypeScript, Python, SQL

Frameworks and Technologies: Spring Boot, ReactJS, ReST, gRPC, Server Sent Events, Docker, Terraform

Infrastructure and GCP: Cloud SQL, Cloud Run, Cloud Functions, Pub/Sub, Load Balancing, IAM

EXPERIENCE

MSCI Inc.

Senior Technology Associate

Pune, India

Jan 2025 - Present

- Automating asset allocations rebalancing in financial models for **MSCI Wealth Manager**, deeply integrated with MSCI's **Quantitative Investment Solutions** for returns and tax calculations
- Utilizing **ReactJS** with **TypeScript** on the UI, **Go** for services and analytics, supported by a highly normalized **PostgreSQL** database managed by **Liquibase**, hosted on **Google Cloud Platform**

Deutsche Bank

Technology Associate

Pune, India

Mar 2023 - Present

- Engineered a **Global SaaS Platform** that streamlined corporate receivables management, **reducing payment processing by over 40 hours/week**, having an Entitlements System that improved user permission configuration from **5 minutes to 10 seconds per user**, and integrating with NPCI NACH for bulk collections and reconciliation
- Built and enhanced client-facing **ReactJS** and MUI web application, integrating with **Go** and **Spring Boot** ReST/gRPC backends and event-driven communication, deployed on **GCP** via **Terraform**
- Delivered a **VPA-Lookup API** which searches for UPI handles given a VPA handle prefix across 10 banks in India
- Developed a **Docker Compose** setup for full application and infrastructure replicas, **reducing test environment setup from 2 hours to 5 minutes** and accelerating development cycles.

Deutsche Bank

Technology Analyst

Pune, India

Aug 2020 - Feb 2023

- Built a **Contextual Marketplace** for partners, where corporates can subscribe to banking products, using **ReactJS** for customer facing web portal, served by ReST backend in **Go**, having microservices supported by **gRPC**
- Developed and enhanced client-facing **Payment and Direct Debit APIs** and within Corporate Banking Technology covering payments across **India, SEPA, UK, Russia** and **Indonesia** using **Spring Boot** and **Spring Webflux**

Fractal

Data Science Intern

Mumbai, India

Jan 2020 - Jun 2020

- Designed and built an **Invoice Digitization** system using **Deep Learning** and **NLP** to extract and reconcile invoice data, automated with **WorkFusion RPA**, which reduced travel invoice processing time from over **20 man-hours to under one man-hour per week**
