SUMMARY

Senior Technology Associate with **5+ years** building distributed financial systems across payments, wealth management, and SaaS platforms. Experienced in **Go, Java, and GCP** with a track record of delivering client-facing products at Deutsche Bank and MSCI.

SKILLS

Languages: Java, Go, TypeScript (ReactJS), Python, SQL

Backend & Systems: Spring Boot, REST, gRPC, Microservices, Event-Driven Architecture, Server-Sent Events

Cloud & Infrastructure: GCP (Cloud Run, Pub/Sub, Cloud SQL, IAM), Docker, Terraform, OpenTelemetry

Data & Messaging: PostgreSQL, Redpanda Kafka, Liquibase

AI-Assisted Development: Cursor, OpenAI Codex, Claude, GitHub Copilot

EXPERIENCE

MSCI Inc.

Pune, India

Senior Technology Associate

Jan 2025 – Present

- Built and automated **asset allocation and portfolio rebalancing systems** for **MSCI Wealth Manager**, integrating quantitative models for returns and tax optimization
- Implemented **Server-Sent Events** for bulk portfolio rebalancing with concurrent execution, supporting **70+ simultaneous rebalances** with real-time per-portfolio status and failure reporting
- Built a **role-based access control system** managing **300+ users across 5+ client organizations**, enabling org admins to control permissions and workflow-level access
- Implemented a configurable **multi-endpoint OpenTelemetry pipeline** pushing to GCP and internal Grafana, designed for zero-code addition of new telemetry sinks
- Instrumented **frontend event tracking via Amplitude** with structured, context-rich events capturing user actions, resource identifiers, and workflow outcomes
- Provisioned reusable **Terraform modules** to provision and manage **2 isolated GCP environments**, enabling consistent and repeatable infrastructure deployments
- Appointed as **Forward Deployed Engineer** for 2 APAC clients (Singapore & Hong Kong), engaging with coverage teams to surface product gaps and feed insights into the engineering roadmap

Deutsche Bank

Pune, India

Technology Associate

Mar 2023 – Dec 2024

- Led development of **Synthix**, a global receivables SaaS platform, reducing manual payment processing by **40+ hours/week**
- Improved entitlement configuration latency from **5 minutes to 10 seconds**, significantly enhancing client onboarding
- Built distributed backend services using **Go and Spring Boot (REST/gRPC)** with event-driven architecture on GCP
- Delivered a **real-time VPA lookup API** integrating 10+ banks, enabling low-latency payment workflows
- Containerized development environments using Docker Compose, reducing setup time from **2 hours to 5 minutes**

Deutsche Bank

Pune, India

Technology Analyst

Aug 2020 – Feb 2023

- Built a **banking product marketplace** enabling corporates to subscribe to financial services
- Developed **payments and direct debit APIs** across India, SEPA, and UK using Spring Boot and WebFlux
- Designed microservices architecture with **gRPC-based inter-service communication** for high-throughput systems
