SUMMARY

Senior technology professional with **6+ years of experience** building distributed financial systems across wealth management, payments, banking, and SaaS. Experienced in **Java, Spring Boot, Go, microservices, and API design**, with production ownership of financial products at MSCI and Deutsche Bank.

SKILLS

Languages: Java, Go, TypeScript (ReactJS), Python, SQL
Backend & Distributed Systems: Spring Boot, REST, gRPC, Microservices, Event-Driven Architecture, Server-Sent Events
Cloud & Infrastructure: GCP (Cloud Run, Pub/Sub, Cloud SQL, IAM), Docker, Terraform, OpenTelemetry
Data & Messaging: PostgreSQL, Kafka/Redpanda, Liquibase
AI & Developer Tooling: MCP, Claude Code, Cursor, OpenAI Codex, GitHub Copilot

EXPERIENCE

MSCI Inc. Pune, India
Senior Technology Associate Jan 2025 – Present

- Developing a **PII tokenization and protection flow** for a Japan-based securities client serving **5,000+ users and 5M+ accounts/portfolios**, integrating the client's master data service via SSE to resolve tokens for authorized display and validate/tokenize user actions before persistence, keeping raw PII out of the product database
- Delivered backend workflows for **asset allocation and portfolio rebalancing** in **MSCI Wealth Manager**, integrating quantitative models for returns and tax optimization
- Engineered concurrent portfolio rebalancing workflows using **Server-Sent Events**, supporting **70+ simultaneous rebalances** with real-time execution status and failure reporting
- Implemented a **role-based access control system** for **300+ users across 5+ client organizations**, enabling organization-level and workflow-level authorization
- Built reusable **GCP Terraform modules** and a configurable **OpenTelemetry pipeline** supporting multiple telemetry endpoints, reducing environment setup from **days to under an hour** and enabling new sinks with **zero application-code changes**
- Cut Amplitude spend from **$2,000+/mo to under $600/mo** by caching user identity in Redux/local storage and resuming sessions via a persistent identifier instead of per-login event pushes
- Built an **MCP-based developer automation server** integrated with **Claude Code, Cursor, and OpenAI Codex**, enabling AI agents to execute development workflows including testing, database migrations, linting, type checking, and code formatting
- Served as **Forward Deployed Engineer for APAC and AMER clients** across Singapore, Hong Kong, and the US, working directly with clients and coverage teams to identify product gaps and translate business requirements into engineering solutions

Deutsche Bank Pune, India
Technology Associate Mar 2023 – Dec 2024

- Led development of **Synthix**, a global receivables SaaS platform, reducing manual payment processing by **40+ hours/week**
- Reduced entitlement configuration latency from **5 minutes to 10 seconds**, unblocking real-time client onboarding
- Shipped distributed backend services using **Go and Spring Boot (REST/gRPC)** with event-driven architecture on GCP
- Delivered a **real-time VPA lookup API** integrating **10+ banks**, enabling low-latency payment workflows
- Cut development environment setup time from **2 hours to 5 minutes** by containerizing with Docker Compose

Deutsche Bank Pune, India
Technology Analyst Aug 2020 – Feb 2023

- Launched a **banking product marketplace** enabling corporates to subscribe to financial services
- Developed payment and direct debit APIs across India, SEPA, and the UK using **Java, Spring Boot, and WebFlux**
- Designed microservices architecture with **gRPC-based inter-service communication** for high-throughput systems

CREDENTIALS

GCP Associate Cloud Engineer | **Synthix – The Asset Triple A Treasurise Award 2024** – Best Cash Management Solution | Multiple-time winner, internal hackathons & innovation challenges (2022–2024)

EDUCATION

Sardar Patel Institute of Technology Mumbai, India
B.E. in Electronics and Telecommunication; CGPI: 8.99 2016 – 2020
